PROJECTS

1. Consulting Website <http://astraviseservices.com/>

- Role: WordPress Developer (or Web Developer / Frontend Developer – based on your contribution)
- Tech Stack: WordPress (Custom Theme/Plugin), HTML, CSS, JavaScript, PHP.

2. Branding Agency Website <https://creativeorion.com>

- Role: Web Designer & Developer
- Tools & Technologies: WordPress, Custom PHP, HTML5, CSS3, JavaScript, Elementor, ACF (Advanced Custom Fields)
- Description:
- Creative Orion is a custom WordPress website project I designed and developed to showcase a modern and creative digital presence for a branding and design-focused agency. I worked on a fully responsive, SEO-friendly, and fast-loading website with a unique layout tailored to the brand's identity. The site includes dynamic content sections powered by ACF, custom post types for blogs and portfolios, and interactive UI elements to enhance user engagement.

3. Cleaning Website <https://heretohelp.ae/>

- Designed and developed a responsive website for Here To Help, a service-based platform in the UAE, using HTML, CSS, JavaScript, Bootstrap, and WordPress.
- Integrated contact forms, service request forms, and call-to-action (CTA) sections to improve customer engagement.
- Optimized website for performance, SEO, and cross-browser compatibility, achieving smooth load times and better search visibility.

EXPERIENCE

FRONTEND WEB DEVELOPER

Creative Orion – Faridabad, India

Jan 2024 – Present

- Leading and managing multiple web development projects, including client websites and internal platforms.
- Designing and developing custom WordPress templates and dynamic websites using HTML, CSS, JavaScript, jQuery, Bootstrap, and PHP.
- Implementing responsive, SEO-friendly, and performance-optimized designs to improve user experience and search visibility.
